

TOWN OF HOPKINTON & AFC URGENT CARE

Register for Event

REGISTER BY JUNE 14

Complete the registration and consent forms attached and email them to Marlboro@afcurgentcaremarlboro.com. Please include a copy of your insurance card. The Hopkinton Health Department will cover the cost for any resident that does not have insurance.

Telehealth Visit

JUNE 15, 16, 17

Once your registration and consent are processed, AFC urgent care will contact you to schedule a tele-health visit. The provider from AFC Urgent Care will complete their assessment and provide a letter for testing. Appointments for the Drive thru testing event will be scheduled by the provider. You **must** complete a tele-health visit to be approved to testing.

Drive-Thru Event

JUNE 18 8:00 AM TO 3:00 PM

Please arrive to the drive-thru testing event for your scheduled appointment. You **must** bring the letter from the AFC provider and a photo ID.

Wait and Isolate

48-72 HOURS AFTER TEST

If you are having symptoms of COVID-19 or were identified as a close contact, you should isolate away from others. Contact your PCP if your symptoms get worse.

Information about the person to receive test (please print): *Required Fields

Name (Last, First, MI)*		Date of Birth*		Age*	Sex*	
		/ /			<input type="checkbox"/> Male	<input type="checkbox"/> Female
Street Address*						
City*		State*	Zip*	Phone*		

Insurance Information: Include the whole member ID number and any letters that are a part of that number

Name of Insurance Company*	Member ID Number*	Group Number if available
----------------------------	-------------------	---------------------------

If Person getting tested is not the subscriber, please complete the following:

Subscriber's Name (Last, First, MI)*		Date of Birth*		Sex:	
		/ /		<input type="checkbox"/> Male	<input type="checkbox"/> Female
Subscriber's Street Address* (If different from address above)					
City*		State*	Zip*	Phone*	
Patient Relationship to Subscriber: (Check One)* <input type="checkbox"/> Spouse <input type="checkbox"/> Child <input type="checkbox"/> Other					

Please read the following very carefully:

Consent for treatment: I, the undersigned, consent to the care and treatment by AFC Urgent Care associates. I acknowledge that no guarantees have been made as to the effect of such treatment.

Notice of Privacy Practices: I have reviewed the AFC Urgent Care Notice of Privacy Practices and understand that I may request a copy of the policy at any time.

Authorization to Release Medical Records or Disclose Protected Health Information: I hereby authorize AFC Urgent Care to release any related documents including results to my employer and its authorized agent: _____.

Limitations of the COVID-19 PCR test: The test we are using has been authorized by the FDA as an Emergency Use Authorization (EUA) method for molecular COVID-19 testing. FDA EUA authorizes assays that have been analytically validated but NOT yet clinically validated to be used. Therefore, formal sensitivity and specificity data are not currently available for this test. Positive results should be interpreted as such and safety actions should be immediately taken to quarantine patient to prevent further spread. In addition, due to the lack of specificity data, the level of its false negative risk is unknown at this point. Furthermore, the test results can only represent a snap shot in time when the specimens are collected. The highest caution should be exercised and in accordance with the prevailing CDC guidelines when making safety workplace decisions regarding employees tested negative. Return to work decisions should NEVER be made solely based on a negative result from this test without first consulting and following the prevailing CDC guidelines on quarantine and home isolation requirements. AFC cannot be responsible or liable for the accuracy of the test results as reported by the lab nor can it be responsible or liable for any occupational medicine client's decisions on workforce management.

Limitations of the COVID-19 Antibody test: Antibody testing, also termed serology testing is a blood test to see if you possess the antibodies against the COVID-19 infection. It involves taking a small sample of your blood and sending it to the lab to test for antibodies against the COVID-19 virus. The sensitivity and specificity of this antibody test is not yet known. This blood test is not indicated if you are experiencing active symptoms (ie. fever, cough, shortness of breath, headache, muscle aches). If you are experiencing these symptoms, you may need molecular (PCR) testing for acute COVID-19 infection.

What if your IgG result is NEGATIVE: this would indicate that you do not possess the antibodies against the COVID-19 virus and therefore would be at risk for contracting the illness. However, it could also indicate that you have presented too early from exposure to the coronavirus and have not had time yet to mount this antibody response. This test is most accurate when done at least 14 days after COVID-19 illness. Negative results do not rule out COVID-19 infection particularly in those who have been in contact with the virus. Follow-up testing with a molecular diagnostic should be considered to rule out infection in these individuals. Results from antibody testing should not be used as the sole basis to diagnose or exclude COVID-19 infection or to inform infection status.

What if your IgG result is POSITIVE: this would indicate that you have had COVID-19. Having the antibodies MAY translate to immunity (for unknown amount of time), though this has not been clinically proven at this time. Positive results could also be due to past or present infection with non-SARS-CoV-2 coronavirus strains, such as coronavirus HKU1, NL63, OC43, or 229E. This test is not to be used for the screening of donated blood.

COVID-19 PCR Testing

COVID-19 Antibody Testing

I have read and acknowledge my consent to the above and give permission for my insurance company to be billed.

COMMON QUESTIONS

Who can be tested at this event ?

This event is being hosted by the Hopkinton Health Department with the help of AFC Urgent Care. Antibody and COVID-19 (PCR) testing will be available for all residents of Hopkinton or any employee that works in Hopkinton and meets testing criteria.

Where will the drive-thru event be?

The event will take place at the Hopkinton Middle School and Hopkinton High School parking lots. There will be signs and a diagram to explain the flow of testing.

What is the testing criteria?

Individuals with symptoms of COVID-19 including fever, cough, sore throat, body aches, loss of smell/taste, or general malaise might meet criteria for testing. Asymptomatic individuals with close contact with a confirmed case of COVID-19 can be tested. All essential employees can also be tested without symptoms. Ultimately, the provider from AFC Urgent Care will determine if you meet criteria and schedule you for testing.

What type of testing is available?

Antibody testing and PCR testing will both be available at the testing event.

What is a PCR test?

PCR testing is a nasopharyngeal swab used to determine if virus particles are present. This test is for patients with symptoms of COVID-19 or essential workers or contacts that do not have symptoms but have had potential exposure.

COMMON QUESTIONS

What is an antibody test?

Antibody testing is a blood draw and helps to understand the immune response to COVID-19. Only individuals that have been asymptomatic for 14 days may get an antibody test.

Will I have to get out of my car?

After you have completed your registration and consent and you have completed your telehealth visit, the provider will give you a letter for antibody, PCR testing for both. On the day of the event, you will bring that letter and a photo ID. PCR testing is quick and will be completed while you are in your car. Antibody testing requires that you park and get out of your car and report to the antibody testing tent.

What is the cost of the test?

The telehealth visit and the testing should be completely covered by insurance. The out of pocket cost for the is \$129 for the telehealth visit and \$150 for lab testing. The Health Department will cover the cost of the event for Hopkinton residents without insurance.

Why have a drive-thru testing event in Hopkinton?

Testing allows us to better understand the spread of COVID-19 in Hopkinton. Bringing drive-thru testing to Hopkinton allows those that do not want to go to a doctor office or that cannot drive long distances to receive testing close to home.

COMMON QUESTIONS

Is it safe?

Testing will only be performed after you have had a consult with a provider from AFC Urgent Care. You should express any concerns with the provider during your visit. The drive-thru event will be staffed by AFC Urgent Care and trained volunteer medical professionals. All safety standards for specimen collection and storage, cleaning and disinfecting will be followed.
